

Application to Conduct Research in Catholic Schools in the Diocese of Ballarat 2017

Appendix 2

CEOB REQUIREMENTS FOR ETHICS APPROVAL OF RESEARCH PROPOSALS

The following two sections outline the types of research proposal which CEOB believes do or do not need to be reviewed by a Human Research Ethics Committee (HREC).

SECTION A. HREC APPROVAL NOT REQUIRED

The Catholic Education Office Ballarat will determine that approval from an Ethics Committee is **not** required for research proposals that involve negligible risk, such as:

- 1. Research that uses data already freely available in the public domain;
- Observation of students and their actions in an educational setting that does not involve identification of individuals or interactions with individuals for the purpose of obtaining data;
- 3. Audit, review or surveys that do not involve the collection of personal or sensitive data;
- 4. Testing as an aspect of normal educational requirements and conducted according to a school's normal policies and practices;
- 5. Collection of student coursework, assignments and essays.

SECTION B. HREC APPROVAL REQUIRED

The CEOB will determine that HREC approval is required for research proposals that involve more than negligible risk, such as those that would elicit a 'YES' response to any of the following questions. The questions are based on the National Health and Medical Research Council (NHMRC) *National Statement on Ethical Conduct in Human Research (2007 – updated May 2013)*, which is available at http://www.nhmrc.gov.au.

1. RESPECT FOR HUMAN SUBJECTS

Research involving humans is subject to the guiding ethical principle of respect for persons with regard to their welfare, rights, beliefs, perceptions, customs and cultural heritage – both individual and collective.

e.g. Does the proposed research involve any of the following topics?	YES	NO
Parenting (parenting strategies or children and young people's attitudes towards parenting strategies		
Potentially sensitive areas, e.g. body image, sexuality, gender identity, sexual behaviour, eating disorders		
Sensitive cultural issues		
Religious beliefs		
Grief, death or serious/traumatic loss		
Any psychological disorder, depression, mood states, anxiety		
Suicide/self harm

Appendix 2: Catholic Education Office Ballarat Requirements for Ethics Approval of Research Proposals

Race or ethnic identity		
Gambling		
Illicit drug or alcohol use		
Self-report of criminal activity or anti-social behaviour		
Disease or health problem		
Fertility/pregnancy		
Drug trials		
Recruits from a vulnerable population, for example, intellectually disabled individuals, people who have undergone trauma, or have a mental illness		
2. POTENTIAL HARM TO THE WELLBEING OF PARTICIPANTS		
In research involving humans, it is the researcher's responsibility to minimise risk discomfort to participants.	s of harn	n or
e.g. Does the proposed research involve any of the following potential risks		
	YES	NO
Stress to participants		
Physical discomfort		
Mental discomfort		
Withholding an advantage from one group from which members could derive 'benefit'		
3. POTENTIAL FOR INFRINGEMENT OF PRIVACY OR OF CONFIDENTIALIT	Y	
Subjects of research should be assured that their participation is confidential and derived from their participation will be treated in a secure and confidential manner.	-	data
e.g. Does the proposed research involve any of the following?	YES	NO
Collection of personal or sensitive data		
Recruitment of participants by a third party		
Concealing the purpose of the research		
Covert observation		
Audio or visual recording without consent		
Potential conflict of interest (e.g. a relationship exists with the researcher such as between teacher and pupil)		

4. BENEFIT AND BURDEN OF RESEARCH ON SUBJECTS

e.g. Does the proposed research involve any of the following?	YES	NO
Involvement of particular groups likely to be subject to over-researching		
An absence of intended benefits to any of the participants		
An inducement being offered to participate in the research		

A researcher is responsible for defining the importance and benefits of the proposed research and balancing these against the burdens placed upon those participating in the research.

In the case of schools conducting their own research, if the principal determines that ethics approval needs to be obtained, and the project is being undertaken in partnership with an external institution, HREC approval should be sought there. Alternatively, the school should contact the Catholic Education Office Ballarat for advice.

For further information regarding these procedures, email the Catholic Education Office Ballarat – <u>director@ceoballarat.catholic.edu.au</u>.
